

# Continuing Education Questionnaire

**Write Your Name:**

Once this form is completed, please submit to [institute@neurorestorative.com](mailto:institute@neurorestorative.com)

## “MPAI-4”

1. What does the MPAI-4 represent?

- A. Mayo Pearson Adaptability Inventory-4
- B. Mayo Portland Ability Inventory-4
- C. Mayo Portland Adaptability Inventory-4
- D. Meyer Pearson Adaptability Inventory-4

2. The MPAI-4 can be used to understand

- A. Outcomes for rehabilitation
- B. Modify programs based on outcome data
- C. Provide an outcome measure that compares to the national standards for CARF Accreditation.
- D. All the above
- E. None of the above

3. The Mayo Portland differs from Functional Independence Measure (FIM) in the following way(s):

- A. The FIM is more appropriate for hospitalization evaluation and outcomes
- B. The MPAI-4 is more appropriate for post-hospital care including inpatient residential, day treatment and home and community
- C. The FIM and MPAI-4 are both outcome measures used in neurological rehabilitation programs
- D. Both A and B
- E. C Only
- F. All The Above

4. The MPAI is in its \_\_\_\_\_ Revision with a total of 29 items that are evaluated with ratings from 0-4?

- A. 2nd
- B. 3rd
- C. 4th
- D. 5th

5. The Ability Index addresses the following...

- A. sensory, motor, cognitive, and communication
- B. mood, interpersonal interactions, family interactions
- C. social contacts, initiation, money management, residence
- D. none of the above

# Continuing Education Questionnaire

6. The Adjustment Index addresses the following...

- A. sensory, motor, cognitive, and communication
- B. mood, interpersonal interactions, family interactions
- C. social contacts, initiation, money management, residence
- D. none of the above

7. The Participation Index addresses the following...

- A. sensory, motor, cognitive, and communication
- B. mood, interpersonal interactions, family interactions
- C. social contacts, initiation, money management, residence
- D. none of the above

8. The MPAI-4 was designed for which of the following person(s) to complete the measure.

- A. Rehabilitation Team
- B. Residential Team
- C. Participants
- D. Family
- E. Nursing/Doctors
- All the above
- None of the above

9. Ratings for each item are based on 0-4. Disability ranges from 0% to 100%. Mark each item below as true or false. If true, both Rating and Disability must match.

Rating	% of Disability	True	False
0 = none	0% disability		
1 = mild	5-24% disability		
2 = mild	5-24% disability		
3 = moderate	25-75% disability		
4 = severe	76% - 100% disability		

10. The MPAI-4 can be used to evaluate a person admitting and/or discharging from a rehabilitation program. The following is also true ...

- A. The MPAI-4 can be used to predict discharge level of disability
- B. The MPAI-4 can be used to determine how many therapy sessions should be provided per day
- C. The MPAI-4 can be used to determine the focus of care on admission
- D. A and C only
- E. B only
