

NeuroRestorative San Antonio offers specialized community-based rehabilitation services and supports for individuals with brain injury and other neurological challenges.

Who We Serve

We provide rehabilitation services to adults with traumatic brain injury as well as other neurological challenges, including those resulting from anoxia, stroke, aneurysm, encephalopathy, brain tumor and seizure disorder. In addition, we are a contracted provider with the Veterans Healthcare Administration Assisted Living Pilot Program for Veterans with Traumatic Brain Injury.

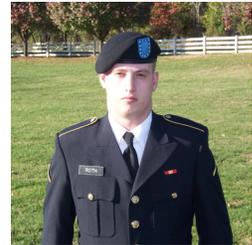

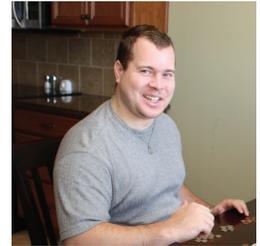

Our Treatment Approach

Our interdisciplinary team of therapists, nursing professionals, life skills specialists and clinicians work hand-in-hand with each program participant and their family to design a treatment plan that includes clinical objectives and interventions, outcome goals and discharge planning. In addition, our highly trained program case managers help drive and oversee the treatment process to ensure optimal outcomes.

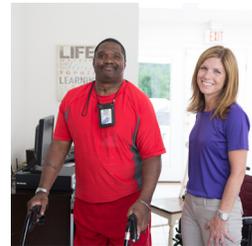

Why NeuroRestorative?

For over 30 years, individuals with brain injury and other neurological challenges have come to NeuroRestorative to rebuild their lives. NeuroRestorative brings a tradition of exceptional services that bridge the gap between acute systems of care and successful reintegration into the community. We build upon the treatment and rehabilitation provided following acute care to ensure a successful transition to optimal independence for home and community living. Our individualized treatment plans focus on the functional skills necessary for daily living, community reintegration, social and emotional growth, and productive activity.

"I can only imagine where he would be right now if he had been able to come [to NeuroRestorative] from the beginning."
- Sue Ann, mother of a person served by NeuroRestorative

"It feels good to be out on my own. It's liberating. It's the next part of my life"
- Kevin, a person served by NeuroRestorative

"Kathryn is finally getting the help she has needed for so long."
- Joan, mother of a person served by NeuroRestorative

Locations & Settings

NeuroRestorative San Antonio offers two neurorehabilitation home-like environments and a day treatment clinic. Our homes, otherwise known as the **Winston Lane** home and the **Twisted Oaks** home, offer inpatient and transitional living options with access to the amenities of San Antonio.

Our **day treatment clinic** provides a therapeutic setting for outpatient services in close proximity to San Antonio's military bases and medical resources. In addition to its state-of-the-art gym and rehabilitation facility, the clinic offers a driving evaluation program that assesses the cognitive ability and improvements of our participants.

Programs & Services

We provide individualized, outcome-driven programs and support services in the most independent setting possible, based on the needs and goals of each participant:

- Physical Therapy
- Occupational Therapy
- Speech-Language Pathology
- Supervised Transitional Living
- Outpatient Day Treatment
- Prevocational Services Coordination
- Neuropsychology
- Behavior Intervention
- Nursing/Medical Management
- Life Skills Training
- Case Management
- Physician Consultation
- Neurorehabilitation
- Neurobehavioral
- Supported Living
- Meal Planning & Preparation
- School and Educational Services

The services listed may be offered by our staff and other professionals on site or in the community. NeuroRestorative also coordinates or assists participants in accessing additional services from other health professionals and local service providers as necessary.
