

FOR IMMEDIATE RELEASE

Tulsa, Oklahoma

March 12, 2009

Frank Lewis, Ph.D., has been appointed as Vice President, Chief Operating Officer to oversee all operations of Specialized Health Services of Oklahoma, Inc. that includes Oklahoma NeuroSpecialty®, a specialized brain injury treatment center located in Tulsa, Oklahoma. Dr. Lewis will also serve as Clinical Director of all clinical operations at the Center.

Dr. Lewis has over twenty five years of experience in the healthcare field. Most recently he served as Chief Operating Officer at Walton Rehabilitation Hospital in Augusta, Georgia. Dr. Lewis was responsible for hospital operations and the development and operation of Walton Rehabilitation Hospital's brain injury rehabilitation services that included inpatient, outpatient, and transitional living services. Dr. Lewis has also held various rehabilitation research and teaching positions with a number of brain injury rehabilitation organizations and universities and has published a multitude of papers and articles in a number of professional journals. He is a noted speaker on brain injury and has been invited to speak at international and national medical rehabilitation and brain injury conferences. Dr. Lewis holds a Ph.D. in Psychology from the University of Arkansas and is certified by the Academy of Certified Brain Injury Specialist (ACBIS) as a Certified Brain Injury Specialist Trainer (CBIST).

"We are very pleased that Dr. Lewis has decided to join our company. Dr. Lewis has a unique combination of executive management skills and a strong clinical knowledge of brain injury treatment needed to oversee our Oklahoma operations.", said Dr. Jack E. Robertson, President and CEO of Specialized Health Services of Oklahoma, Inc. Oklahoma NeuroSpecialty® Center is the only hospital-licensed facility in the State of Oklahoma providing specialized post-acute brain injury services. The Center is accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF). It serves individuals affected by chronic and persistent functional disabilities following acquired brain injuries occurring after traumatic injury or other illnesses and conditions affecting the brain. "The loss of function resulting from a severe acquired brain injury can be devastating. Oklahoma NeuroSpecialty® is committed to helping our patients regain the skills to live a fulfilling life after brain injury by providing them with compassionate cutting edge treatment and comprehensive education. I am excited to join the team at Oklahoma NeuroSpecialty® and be part of this outstanding clinical program" stated Dr. Lewis.

According to the Brain Injury Association of America, brain injury affects over 1.4 million individuals each year, resulting in hospitalization of over 235,000 individuals each year.
