

NeuroRestorative National Capitol offers specialized community-based rehabilitation services and supports for Veterans and Military Service Members with brain injury and other neurological challenges. We are a contracted provider with TRICARE and with the Veterans Healthcare Administration Assisted Living Pilot Program for Veterans with Traumatic Brain Injury.

Military Culture

At NeuroRestorative National Capitol, we have created an environment that integrates the military culture of the individuals we serve. Like our participants, many members of the staff are Veterans themselves. Our specialized programs combine military values with real-world application in preparation for a successful transition to independence at home.

Family

We value the active participation of families in their loved ones' road to recovery and consider them to be an integral part of our treatment team. We understand that traumatic brain injury and other neurological injuries or conditions impact not only the participant, but the entire family. We offer counseling—with and without the participant—for families coping with the challenges of such injuries. We also provide training for family, both at our program location and in the home, to make the transition as smooth and successful as possible when a loved one is ready to return home.

Services

We offer the following array of services based on the needs and goals of each program participant:

- Physical Therapy
- Occupational Therapy
- Speech Language Pathology
- Supervised Transitional Living
- Outpatient Day Treatment
- Neuropsychology
- Behavior Intervention
- Nursing/Medical Direction
- Life Skills Training
- Case Management

The services listed may be offered by our staff and other professionals on site or in the community. NeuroRestorative also coordinates or assists participants in accessing additional services from other health professionals and local service providers as necessary.

"We've all had similar experiences, so we are able to relate to one another, and because they have been in the service we can identify with each other and talk about our time in the military."

-Anthony,
a veteran served by
NeuroRestorative

Location & Setting

Located on five acres of land, our five-bed home in Germantown, Maryland offers a serene, therapeutic environment just outside the dynamic city of Washington, DC. The program's close proximity to resources including the Walter Reed National Military Medical Center provides the unique opportunity for collaboration with the many military supports the region already has in place, offering seamless continuity of care for Veterans and Military Service Members.
