

NeuroRestorative Academy provides education and therapeutic services designed to make learning accessible to students who have a Traumatic Brain Injury (TBI) and the secondary conditions that accompany those who experience head trauma.

About

NeuroRestorative Academy is an approved ISBE 14-7.02 [a]-401 regulations school, in Mount Prospect, Illinois, for students ages 14 to 22 who have experienced traumatic brain injury (TBI) or neurologic impairment. In addition to receiving an education, students also receive personalized rehabilitative services in a supportive environment. The students we serve may be experiencing challenges within their classrooms due to learning disabilities, emotional disturbance, multiple-disabilities, speech and language impairments or other health impairments due to TBI or neurologic impairment. NeuroRestorative Academy is approved to serve **students who require residential placement** as well as **day school programming**.

Curriculum and Services

NeuroRestorative Academy uses an innovative approach, the **Dynamic Learning Plan**, to support students in reaching their optimal potential. Drawing on positive and proactive intervention approaches from the fields of Applied Behavior Analysis (ABA) and Positive Behavior Interventions and Supports (PBIS), students achieve across the **educational, behavioral and social learning** environments. We offer students an array of personalized supports and services designed to promote their academic and rehabilitative success, including:

- Speech/Language Therapy
- Assistive Technology
- Behavior Analysis
- Physical Therapy
- Occupational Therapy

The intensity and duration of all services are based on each student's IEP and are adjusted based on successes or evolving needs.

NeuroRestorative Academy provides a supportive academic environment in which students feel included, proud and comfortable with who they are, preparing them for who they will become.

Program Outcomes

NeuroRestorative Academy is designed to provide students with TBI with a quality education while helping them to:

- Improve behavior regulation skills
- Improve academic skills
- Improve executive functioning
- Thrive in a less restrictive education setting
- Transfer newly learned skills or information to new settings
- Apply Assistive Technology in skill and information acquisition in new settings

Campus Locations

Chicagoland Campus. Our campus, located just outside of Chicago, offers a quiet neighborhood setting with convenient access to area physicians, recreational activities and shopping.

Carbondale Campus. Located in picturesque Southern Illinois, our campus' close proximity to medical resources and Southern Illinois University offers the opportunity for collaboration and continuity of care for participants.
