

Home & Community Living Programs

NeuroRestorative New Jersey offers supports and services throughout New Jersey, New York and Pennsylvania, both at home and in the community, designed to help individuals with brain injury and other neurological challenges live life more independently.

Why NeuroRestorative?

NeuroRestorative's home and community living programs bridge the gap between inpatient rehabilitation and regained independence. We provide one-on-one rehabilitation focusing on activities of daily living, community reintegration, social and emotional growth, and vocational goals. In addition, we offer school re-entry and supported employment services.

Who We Serve

Our programs serve adults with brain injury and other neurological challenges by addressing both the cognitive and physical complications resulting from anoxia, stroke, aneurysm, encephalopathy, brain tumor, traumatic brain injury, seizure and other neurological disorders.

Individualized Care

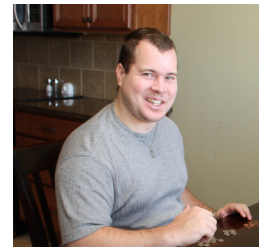

Our transdisciplinary team works together with the program participant and their family to develop an Individual Rehabilitation Plan (IRP) that includes goals, interventions, outcomes and supports. Each program participant is assigned a highly trained clinical coordinator who provides therapeutic case management and service coordination.

Services

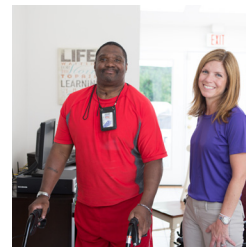

Our home and community living programs are delivered in the individual's home, community and/or work setting to help reestablish a long term support network in a familiar setting. We offer the following services:

- Cognitive Therapy
- Life Skills Training
- 24-Hour on-call Support
- Family Education & Training
- Case Management
- Community Integration
- Medication Monitoring
- Life Skills Therapy
- Vocational & Productive Activities

"I can only imagine where he would be right now if he had been able to come [to NeuroRestorative] from the beginning."
- Sue Ann, mother of a person served by NeuroRestorative

"Kathryn is finally getting the help she has needed for so long."
- Joan, mother of a person served by NeuroRestorative

"It feels good to be out on my own. It's liberating. It's the next part of my life"
- Kevin, a person served by NeuroRestorative
