

Continuing Education Questionnaire

A Focused Mind: Shaping Attention
through Collaborative Programming

Write Your Name:

Once this form is completed, please submit to institute@neurorestorative.com

1. Which of the following is not a type of attention?
 - Selective
 - Procedural
 - Alternating
 - Focused

2. Which of the following was listed as a treatment approach for impairments of attention in individuals with acquired brain injury?
 - Franklin-Covey Planner
 - Berg Balance Scale
 - Attention Process Training
 - Mendelsohn Maneuver

3. How many possible outcomes are possible under dual-task performance?
 - 2
 - 5
 - 6
 - 9

4. Which of the following is an advantage to dual-task training?
 - Demo greater improvements in motor performance
 - Greater improvement in tasks not directly trained (i.e. generalization)
 - May reproduce tasks more similar to “real world” experiences, thereby facilitating specific neuroplastic recovery (what fires together, wires together)
 - All of the Above

5. Which of the following is not a cognitive domain?
 - Memory
 - Executive Function
 - Language and Communication
 - Swallowing

Continuing Education Questionnaire

A Focused Mind: Shaping Attention
through Collaborative Programming

6. Which of the following therapeutic concepts would be most helpful when providing instruction to someone with an attention impairment?
 - Provide maximal distractors to challenge the person's attentional abilities.
 - Engage the person with eye contact and tactile stimulation to direct attention.
 - Provide all information to the person in an auditory manner, only.
 - Schedule all therapy sessions for late in the day.

7. Which of the following variables won't be measured when using the dual-task performance formula?
 - Single cognitive task
 - Rest time
 - Single physical task
 - The combined physical and cognitive task

8. Which of these would be considered dual-task activities?
 - Walking and talking
 - Talking and texting
 - Typing and listening to instructor
 - All of the above

9. Which of the following environments will most likely have the most distractions?
 - Speech Therapy office
 - Rehab Gym
 - Room of Person Being Served
 - Nurses Station

10. Which of the following is an indicator that the learner is paying attention to you while speaking?
 - They are at the same table as you
 - They are giving you eye contact
 - They are nodding their head
 - None of the Above
