

Pediatric Brain Injury Rehabilitation

Post-acute brain injury rehabilitation programs and services for children and adolescents ages 4-17

About Us

NeuroRestorative Timber Ridge's **pediatric program** provides rehabilitation and academic services to children and adolescents, ages 4-17, with brain injury and other neurological challenges. Our individualized treatment plans help young people reach appropriate **developmental milestones** and build the skills and confidence they need to be **successful**.

Our Treatment Approach

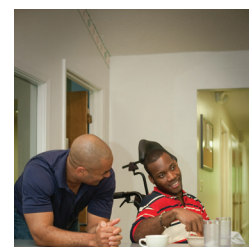

Our **interdisciplinary team** of therapists, special education professionals, life skills trainers and clinicians work hand-in-hand with each child and their family to design an **individualized treatment plan** that includes restorative therapies, behavior intervention strategies, education goals, family training and home re-entry supports. Additionally, we do not lose sight of the unique social needs of children and adolescents. Our program **fosters friendships** and creates an environment with ample opportunities for **peer-to-peer interaction**.

Family Support

The NeuroRestorative Timber Ridge pediatric treatment team understands that **family involvement** is a critical component of recovery for a child or adolescent. Our team works to **bridge the distance** during out-of-home treatment, and help families understand what to expect after treatment. Case managers oversee each child's treatment and discharge plan. Upon discharge we partner with families and traditional educational institutions to ensure a **smooth transition** back to a less structured setting.

"When you met me, I was a kid crying out for help. Today, I'm having fun because I'm starting to form my own identity."

- Brian,
a teen served by
NeuroRestorative

"I would like to take this time to say thank you Timber Ridge. Every nurse, doctor, staff that helped my daughter—you all are very awesome people."

- Deborah, mother of a child
served by NeuroRestorative

"Kathryn is finally getting the help she has needed for so long."

- Joan, mother of
a teen served by

Location & Setting

Located on a 340-acre campus in the rolling hills of Benton, Arkansas, NeuroRestorative Timber Ridge offers a rural setting with plenty of room for children to play and enjoy the outdoors. Children and teens live in beautiful cabins where they have countless opportunities to receive specialized services, attend school and enjoy therapeutic activities alongside their peers.

Our unique facility, provides cutting-edge treatment with the appropriate levels of supervision, supports and activities for each participant so they can continue to learn, grow and become increasingly independent to facilitate a more successful transition back to their own school and community.
